

HOW TO TEST YOUR AUDIO AND VIDEO ON AN IPAD

- First, ensure Zoom has access to your device's microphone.
 - ✓ Go to Settings > Privacy > Microphone.
 - ✓ Make sure the toggle for Zoom is turned on.
- Open the Zoom app to make sure the video is working, and the device is in a good position.
- In the Zoom app, click “New meeting.” You are essentially starting a meeting where you are the only participant.

New Meeting ▾

- Make sure “Video On” is selected.
- Click “Start Meeting.”
- Click “Call using Internet Audio”
You are essentially starting a meeting where you are the only participant.
- You will see video of yourself. That’s what other participants will see. Make sure you see yourself in the center of the screen – you may have to reposition the device. Set the device on a table or desk so that it will be still.
- End this test meeting by clicking the red “End Meeting” in the upper left corner of the screen.
- The click the red “End Meeting” on the next window that is displayed.
