

Zoom Tips

iPhone (iOS) / iPad (iPadOS) -- Change Your Zoom Screen Name

For security and privacy, many Zoom events (meetings and webinars) restrict admission to known/registered people. So when individuals request admission with less than full names shown, it prevents being recognized and slows or denies admission.

The easiest way to ensure correctly displaying name is to create a free Zoom account registered with full name. Doing this takes just a few seconds by visiting zoom.us and clicking "Sign up, it's free". An added benefit is the ability to upload a profile picture for display if camera isn't used; that lets you be recognized and prevents you from appearing as the too-common and boring silhouette.

If you prefer, to ensure display of correct name without using a Zoom account:

- Open Settings
- Click General
- Click About
- Click Name
- Enter your name
