

## **Increase / Decrease Volume Of Sound In A Zoom Session**

On ALL Apple devices, your device, NOT the zoom program, controls the volume. Please note that if you have muted your device's volume control, you will not be able to hear anyone, and no one will be able to hear you regardless of how you configured your microphone in the Zoom program.

So...BEFORE starting your zoom session, set the volume control on your device to a comfortable, clearly audible, level.
