

If you want other people to be able to see you, make sure your video is turned on.

Note that video on an iPhone is very difficult for other participants to watch if you're holding the phone and possibly moving around. You may want to keep the video turned off if you're on an iPhone, or else you should prop it up on a table.

If you keep video turned off, you will be able to see other people, but they will only see your name.

How to turn on video on an iPhone

- Tap anywhere on the screen so commands are displayed.
- On the lower left of the screen, just to the right of the microphone icon, you will see a red videocamera icon with a slash through it, with the words "Start Video" below it. This means your camera is turned OFF.

- Click that red videocamera and it will turn white, with the words "Stop video" below the icon. This means your camera is turned ON.
