

Updating Zoom for Windows

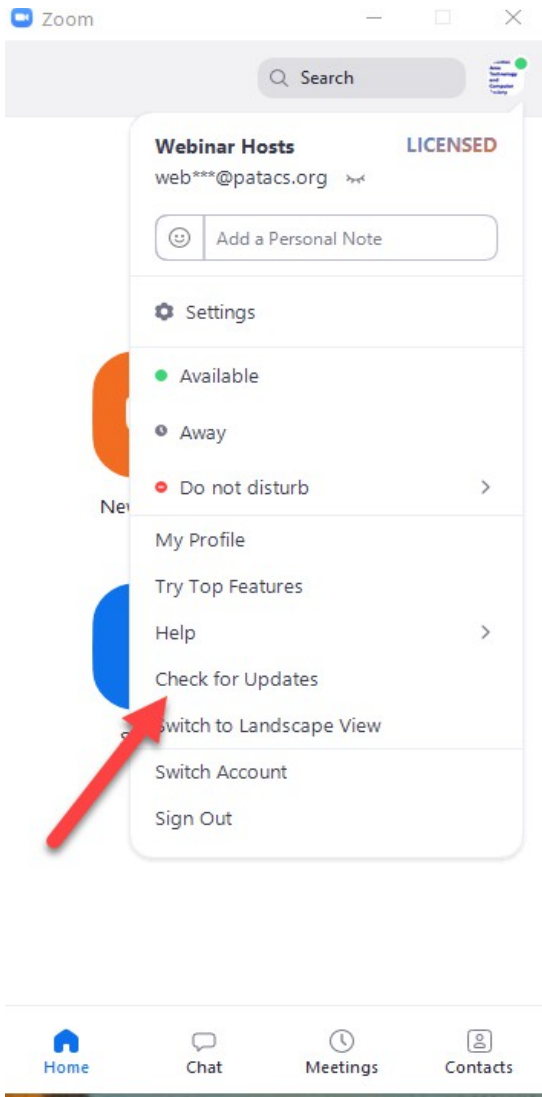

The Zoom cloud meeting app is constantly being updated to add new features and correct issues. We recommend that you take five minutes before starting a Zoom session to see if an update has been released – if so, install it.

Click on the Zoom icon on your desktop.

Click on your profile picture in the upper right corner (green arrow).

Click on “Check for Updates (Red Arrow).”

If there's an update available, install it. It will only take a few minutes to do so, and you'll be able to take advantage of any new features.

Not clear? Want more info? Go to the Zoom page on this topic:
